Establishment Survey Data on the 1987 SIC

U.S. Department of Labor
Lynn Martin, Secretary

Bureau of Labor Statistics
Janet L. Norwood, Commissioner

March 1991

Bulletin 2370

Preface

This bulletin presents, in two volumes, historical monthly and annual average data on national establishment-based employment, hours, and earnings by detailed industry, classified in accordance with the 1987 *Standard Industrial Classification (SIC) Manual.*

This is the first issuance of historical data based on the 1987 SIC structure. It supplants *Employment, Hours, and Earnings, United States, 1909-84* (BLS Bulletin 1312-12) issued in 1985 and the *Supplement to Employment and Earnings* issued in August 1989, both of which presented data based on the 1972 SIC.

The data are obtained from the Current Employment Statistics (CES) program, a Federal-State cooperative endeavor in which data are collected monthly from the payroll records of a sample of nonfarm business establishments. In 1990, the sample included over 340,000 establishments employing over 40 million wage and salary workers.

The conversion to the 1987 SIC structure was effective with the publication of data for August 1990. Coincident with this conversion, all national estimates of employment, hours, and earnings were adjusted to March 1989 benchmarks—comprehensive counts of employment based primarily on unemployment insurance reports filed by employers with State employment security agencies. As is the usual practice with the introduction of new benchmarks, all seasonally adjusted series were revised to incorporate updated seasonal adjustment factors. In addition, all published constant-dollar and indexed series were rebased from 1977=100 to 1982=100.

All data from April 1988 forward reflect both the March 1989 benchmark adjustments and the effects of the SIC revision. Historical (pre-1988) data for industry series affected by the SIC revision have been reconstructed where possible. Historical data for the industry series unaffected by the SIC revision remain as previously published. All rebased constant-dollar and indexed series have been recomputed back to the date of inception.

In accordance with the usual practice, all published seasonally adjusted series have been revised for the most recent 5 years (1985-90). In addition, series affected by the SIC revision which were reconstructed for years prior to 1985 have again been seasonally adjusted, based on the 1987 SIC-based estimates. Also, seasonally adjusted average weekly hours and manufacturing overtime hours series have been recomputed from January 1980 forward to incorporate a new moving-holiday adjustment introduced in May 1990 with the publication of April-July 1990 seasonal adjustment factors.

Most of the data presented in this bulletin are supplemented on a current basis by the monthly publication *Employment and Earnings*, available by subscription from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. In addition, published series in the form of magnetic tapes and personal computer diskettes are available to interested data users on a cost-for-service basis. Inquiries should be addressed to the Division of Monthly Industry Employment Statistics, Bureau of Labor Statistics, Washington, DC 20212.

This bulletin was prepared under the direction of Patricia M. Getz, a supervisory economist in the Division of Monthly Industry Employment Statistics, George S. Werking, Chief. Data verification was directed by Mary Lee Seifert, a supervisory economist in the same division. Data were processed under the direction of Brendan J. Powers, Chief, Division of Federal/State Monthly Surveys. Editorial assistance was provided by Gloria Peterson Green, Chief, Data Users and Publication Services Group.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission.

Introduction ix

Detailed statistics by industry:
  Employment, hours, and earnings:
    Service-producing industries 688
      Private service-producing 689
        Transportation and public utilities 691
        Wholesale and retail trade 729
          Wholesale trade 733
          Retail trade 764
        Finance, insurance, and real estate 816
        Services 835
      Government 874
        Federal 874
        State 880
        Local 882

Special series by industry:
  Indexes of aggregate weekly hours 886
  Indexes of aggregate weekly payrolls 899
  Diffusion indexes of employment change 914
  Average hourly earnings, excluding and including lump-sum payments for selected aerospace industries 916
  Average hourly earnings, excluding overtime, of manufacturing production workers 917

Contents–Continued

Volume II—Continued:

Seasonally adjusted series by industry:

All employees 925
Women employees 947
Private production or nonsupervisory workers:
Employment 959
Average weekly hours 973
Average weekly overtime hours for manufacturing production workers 984
Average hourly earnings 985
Average hourly earnings, excluding overtime, for manufacturing production workers 987
Average hourly and weekly earnings, in current and 1982 dollars, total private 989
Indexes of aggregate weekly hours (1982=100) 990

Footnotes 1004

Introduction

This two-volume bulletin presents historical monthly and annual average data on national establishment-based employment, hours, and earnings by detailed industry based on the 1987 SIC structure. Volume I presents data for goods-producing industries; volume II, service-producing industries.

Included are monthly and annual average employment for all employees (including government); women employees; production workers in mining and manufacturing; construction workers in construction; and nonsupervisory workers in transportation and public utilities; wholesale and retail trade; finance, insurance, and real estate; and services. Also shown for the private nonfarm industries are average weekly hours and average hourly and weekly earnings in current and constant (1982) dollars. Average weekly overtime hours are presented for selected manufacturing series.

Volume II also presents special series for selected industries. These series include indexes of aggregate weekly hours and payrolls related to 1982 as the base year; diffusion indexes of employment change for the total private sector and for manufacturing industries; average hourly earnings, excluding and including lump-sum payments, for selected aerospace industries; and average hourly earnings, excluding overtime, for selected manufacturing industries.

In addition, volume II presents historical seasonally adjusted series through November 1990 for over 200 of the employment, hours, and earnings series described above.

Appendix A describes the major technical characteristics of the establishment survey, such as collection, concepts, estimating techniques, and seasonal adjustment methodology, as well as comparisons with other series. Appendix B provides detailed information on the conversion to the 1987 SIC and its effect on published data. Appendix C provides information on the availability of published series on national establishment-based employment, hours, and earnings.
